

# Bressingham & Fersfield Parish Council

## BIODIVERSITY POLICY

Bressingham & Fersfield Parish Council formally adopted this policy on the 26<sup>th</sup> January 2026 in response to the strengthened 'biodiversity duty' placed on local authorities introduced by the Environment Act 2021. Bressingham & Fersfield Parish Council will take biodiversity into account in all its decisions and actions.

### Background

All local authorities including parish councils must complete their first consideration of what action to take for biodiversity by 1st January 2024. Policies and objectives must be agreed as soon as possible after this. Councils can and should reconsider their actions on a quarterly, annual or regular basis and must reconsider the actions they can take within five years of when they completed their previous reconsideration.

According to the Act, public authorities need to check if a number of strategies affect how they comply with their biodiversity duty including:

- Local nature recovery strategies
- Species conservation strategies
- Protected site strategies.

They need to understand how or if they are relevant to their organisation, be aware of how these strategies affect land that is owned and managed by them, or actions they could take to conserve or enhance biodiversity and consider how they can contribute to the strategy where appropriate.

Biodiversity is the collective term for the variety and abundance of forms of life found in an area, including animals, plants, fungi and microorganisms like bacteria. Each of these species and organisms work together in ecosystems to maintain, balance and support life. Biodiversity supports everything in nature that we need to survive including, food, oxygen, clean air and clean water.

### Commitment

#### Bressingham & Fersfield Parish Council ("the Council") will:

1. Consider the impact on biodiversity in the decisions it makes in Council. It will look to minimise adverse impacts on biodiversity.
2. Encourage practices and projects beneficial to biodiversity through the local community. Church & Cemetery grounds walks & talks, engage with the farming community, as an example.
3. Communicate information and raise awareness of biodiversity through its website.
4. The Council will work in partnership with other organisations to protect, promote and enhance biodiversity within areas of the parish, when necessary.
5. The Council will, wherever possible, raise public awareness of biodiversity issues as part of its leadership role within the local community.
6. The Council, when commenting on planning applications, will support site and building design that benefits biodiversity through the conservation and integration of existing habitats or provision of new habitats. It will support protection of sensitive habitats from development and will consider whether the development would mean the loss of important habitats for wildlife in respect of all applications.
7. Monitor its internal policies and processes to enhance biodiversity.

As a landowner of the allotments to encourage the Bressingham & Fersfield Allotment Association to incorporate the Parish Councils policy into their activities. **It will:**

1. Proactively remove invasive and non-invasive species as required under appropriate legislation to prevent harm to native species.
2. Avoid the use of pesticides and herbicides except in exceptional circumstances.
3. Properly scale and time grounds maintenance work or vegetation removal such that the impact on biodiversity is minimised. Maintenance practices that are beneficial to biodiversity will be taken into consideration when contracts are placed.
4. Create dedicated spaces to attract and enhance wildlife. Leave standing and fallen dead wood as a habitat for invertebrates and leaf litter and dead vegetation, wherever possible, as a habitat for invertebrates. Leave a margin of uncut grass, where practical, around hedges to allow longer grasses to grow.
5. Ensure that any hedge and tree cutting takes place in accordance with tree and hedgerow

management policies.

Bressingham & Fersfield Parish Council will not produce a biodiversity report and there is no legislative requirement to do so.

**Date of next review:** 25<sup>th</sup> January 2027.
